

Monthly Report

Cargo iQ Reporting Cycle

Every month, Cargo iQ issues reports that show consolidated airfreight industry data for the previous month.

This monthly report contains volume and performance data for airport-to-airport (A2A) movements.

Further reports are available to Cargo iQ members to improve their internal process– and data-quality and benchmark themselves to the industry.

GLOSSARY

NFD - Measure of on time 'Notification of freight and data* availability' at destination.

POD - Measure of freight delivered to consignee when promised.

A2A - Airport to airport

D2D - Door to Door

Data Summary

Number of A2A shipments measured for January 2021 are lower in comparison to the previous months because one member airline could not report their numbers owing to technical difficulties. Numbers still remain low as compared to this period last year.

There is a decrease in D2D shipment count for January against December, discontinuing previous months' trends of a gradual increase, and the numbers compared against last year remain very low, same as A2A.

Benchmarks - Jan 2021

Average A2A Journey Time

# Shipments	Average RCS to NFD Time [h]

Reporting Remarks

Cargo iQ is committed to the global implementation of its quality processes and where members do not reach the minimum threshold for reporting their individual performance scores are withheld to allow for realistic comparison of quality performance. Forwarders AGI and SDV have a lower reported performance due to a technical issue in messaging for the month of January only.

All reports represent members with different networks, product portfolios and Cargo iQ shipment-share compared to total volumes. No conclusions on their relative performance in the form of ranking should be drawn.
